

## It's time to stop being silent about the FACTS\*

You're only getting the "politically correct" version about homosexuality. Here's what they're NOT telling you. Homosexual behaviors are associated with *much* higher rates of:

- **Diseases:** HIV/AIDS, anal cancer, liver cancer, HPV, syphilis, gonorrhea, chlamydia, hepatitis, herpes, meningitis, tuberculosis, and multi-drug resistant infections, etc.
- **Mental health problems:** Suicide, depression and anxiety, drug addiction, alcohol addiction, smoking, obesity (women), etc.
- **Destructive behaviors:**, Domestic violence, promiscuity, sadism, etc.
- **Shortened life**, especially as a result of HIV/AIDS (even with the new medicines).

No one is "born that way." There's no scientific evidence. In fact, the world is full of people who have been healed.

***Don't be intimidated by the propaganda.*** Yes, *silence* DOES equal death! Stand up and tell the truth.

\*Sources: Center for Disease Control (CDC); *The Lancet*; Gay and Lesbian Medical Assn; Fenway Guide to LGBT Health.
