

Talking points: Vote NO on AB 2943:

This bill is clearly unconstitutional, given the June 26 US Supreme Court ruling that the government *may not regulate* “*professional speech*”.

This bill would make it illegal to counsel vulnerable children and adults who have sexual orientation or “gender identity” issues that they desperately want to address.

This will hurt children and adults who have been raped or molested and desperately need counseling. These people often become suicidal – so this bill could help kill them.

Many people’s lives have been saved by reparative therapy, which helps people work out the pain, trauma, and other issues that lead them to destructive behaviors.

This is being pushed by radical special interest groups that **don’t care about the needs of vulnerable people**. These dishonest activists are telling legislators **blatant lies and misinformation** to pass this. (See sheet)

Similar bills have been rejected by nearly 20 states across the country.
