December 1, 2025

Dear MassResistance Friend and Supporter,

This has been a dynamic year of activism for MassResistance! We are doing big things that **no other pro-family group** is doing (and many are afraid to do). Some of our work has received national attention in the mainstream media!

As we've all seen, despite the Republican win in last year's national elections, the LGBT movement has not backed down on their radical agendas in the schools and society. In many ways, they're pushing even harder. This has stymied much of the pro-family movement. But MassResistance has stepped up our activism to *meet it head on!*

Here are some examples of what we've been doing this year:

1. Training parents to effectively confront local leftists. An immediate hurdle in our big project to get the radical agendas out of school districts was the seemingly unhinged but organized attack strategy of local leftist groups. They viciously went after parents, school board members, and anyone else wanting reasonable reform. It was frightening and demoralizing.

But we know these leftists are like classic bullies. When *directly confronted* they become cowards and fade away. Starting in Redlands, CA, we trained parents to do that very well, and it made a huge difference there!

2. State resolutions against "gay marriage." The US Supreme Court's deeply flawed 5-4 *Obergefell* ruling in 2015 forced "gay marriage" on America. It needs to be revisited and overturned by the current Supreme Court. But we need to make it a burning issue again!

So this past year, MassResistance activists persuaded state legislators across the country to introduce resolutions demanding that the Court overturn *Obergefell*. The resolutions are not legally binding but make a powerful statement. They were passed in the state Houses in Idaho and North Dakota and are on track in several others. This caused a huge firestorm! It was breathlessly reported in the *New York Times*, *Washington Post*, *NBC News*, *Boston Globe*, and dozens of other mainstream outlets. It's now beginning to get the attention it needs!

3. Stopping the Left's "cancel culture." It's become a common tactic: When leftists don't like a conservative speaking out, they will work hard to get him fired from his job. The conservative movement is, sadly, afraid of this. But at MassResistance we aggressively step in to fight for the targeted person. An employer who obeys leftists will get a strong dose of vitriol from citizens in the community! That changes minds. We've been successful across the US and even in Canada!

This year a nurse in Kansas outlined on social media the medical dangers to children of "transgender" medical procedures. LGBT activists got the state Board of Nursing to begin the steps to revoke her nursing license. She reached out to us for help. Our activists got the Kansas Attorney General involved on her behalf. The Board of Nursing was forced to reverse course.

(over . . .)

And we're not letting up! We're in the process of finding out who filed the complaints against the nurse.

4. Derailing offensive "Pride" events in conservative towns. A recent tactic by the LGBT movement is to push their agenda very publicly in small towns in "red" states. An LGBT group will reserve an area in a public park to stage a gaudy "pride" event, often with Drag Queens, where children are encouraged to come by. Local city councils are afraid to deny the permit. Local citizens are outraged but don't know what to do.

This year, MassResistance organized citizens in Oklahoma towns to demonstrate widespread public opposition to the radical events, including a threatened boycott of any local businesses who would sponsor them or come as vendors. The LGBT groups got the message and cancelled those events.

5. Exposing the destructive work of LGBT student clubs in schools across the country. There's another hurdle we've found in our project to rid school districts of radical agendas. "Conservative" parents will complain about boys in girls' sports or "gender ideology." But they're just fine with (or unaware of) the LGBT school clubs that bring much of that "gender" madness into the school environment. Some of those conservatives (wanting to appear "tolerant") may even oppose parents who criticize the clubs!

So MassResistance is now publishing a ten-part series documenting in detail – from our own undercover work – how toxic and dangerous these "clubs" are to everyone in the school district. It's worse than you can imagine! We break through the propaganda and intimidation with the truth.

No one else does this kind of activism across the country. *We are making a difference!*

Conservative foundations are afraid to support this kind of confrontational activism, especially when it involves taking on the LGBT movement.

Regular people like you make our work possible.

And more: As we write this, we're almost half-way toward our matching challenge. Recently, a generous supporter offered to donate **\$100,000** if we can raise a matching amount by the end of 2025. So every donation this month (even from monthly donors) will be doubled!

Your investment in MassResistance's work goes a long way.

Thank you! And best wishes for Christmas and the New Year!

Sincerely,

Brian Camenker
President

Not yet a monthly donor? *This is the time to do it!!*

Many people who are receiving this letter are monthly donors. If you are not yet one, please consider it.

Regular donors are our backbone! You can become a monthly donor by credit card (sign up using the enclosed form or at our website) or by mailing a check each month.
